

The Intellectual Foundation Of Information

The work's first five chapters are concerned with an 'analytic discussion of the intellectual foundation of information organization', beginning by identifying the main purpose of systems for organising information - 'bringing like things together and differentiating among them'.

The Intellectual Foundation of Information Organization ...

Elaine Svenonius intended that The Intellectual Foundation of Information Organization reach across disciplinary boundaries and inform the broader practice of information organization. To judge by my reaction to the book and the reactions of others I know, she has succeeded.

The Intellectual Foundation of Information Organization ...

The first five chapters are an analytic discussion of the intellectual foundation of [End Page 358] information organization. In them Svenonius discusses definitional issues, such as what constitutes information or a document; the objectives of systems designed to retrieve information; the nature of bibliographic entities; the nature of the language used to describe bibliographic entities; and the principles of description followed in bibliographic analysis.
